**Higher order thinking – Analysis and integration: Comparison**

**5A Chapter 2 Life cycle (2) Animals**

*26/9*

1. What are the similarities and differences between viviparous animals and oviparous animals? Complete the Venn diagram below.

**Compare the similarities and differences between viviparous animals and oviparous animals**

in the mother's body to develop, and are not born until

2. What are ovoviviparous animals? Make a guess and write it on the \_\_\_\_\_.

Ovoviviparous animals refer to 'internal incubation of eggs,' which means that the fertilised eggs produced by internal fertilisation of animals remain
